

# SEX AND CORONAVIRUS DISEASE 2019 (COVID-19)

All Ohioians should stay home and minimize contact with others to reduce the spread of COVID-19.

## BUT CAN YOU HAVE SEX?

Here are some tips for how to enjoy sex and to avoid spreading COVID-19.

## KNOW HOW COVID-19 SPREADS

### You can get COVID-19 from a person who has it;

- The virus can spread to people who are within about 6 feet of a person with COVID-19 when that person coughs or sneezes.
- The virus can spread through direct contact with their saliva or mucus.

### We still have a lot to learn about COVID-19 and sex;

- COVID-19 has been found in feces of people who are infected with the virus.
- COVID-19 has not yet been found in semen or vaginal fluid.
- We know that other coronaviruses do not efficiently transmit through sex.

## HAVE SEX WITH PEOPLE CLOSE TO YOU

- **You are your safest sex partner.** Masturbation will not spread COVID-19, especially if you wash your hands (and any sex toys) with soap and water for at least 20 seconds before and after sex.
- **The next safest partner is someone you live with.** Having close contact — including sex — with only a small circle of people helps prevent spreading COVID-19.

- **You should avoid close contact — including sex — with anyone outside your household.** If you do have sex with others, have as few partners as possible.
- **If you usually meet your sex partners online or make a living by having sex,** consider taking a break from in-person dates. Video dates, sexting or chat rooms may be options for you.

## TAKE CARE DURING SEX

- **Kissing can easily pass COVID-19.** Avoid kissing anyone who is not part of your small circle of close contacts.
- **Rimming (mouth on anus) might spread COVID-19.** Virus in feces may enter your mouth.
- **Condoms and dental dams can reduce contact with saliva or feces,** especially during oral or anal sex.
- **Washing up before and after sex is more important than ever.**
  - Wash hands often with soap and water for at least 20 seconds.
  - Wash sex toys with soap and warm water.
  - Disinfect keyboards and touch screens that you share with others (for video chat, for watching pornography or for anything else).

## SKIP SEX IF YOU OR YOUR PARTNER IS NOT FEELING WELL

- **If you or a partner may have COVID-19,** avoid sex and especially kissing.
- **If you start to feel unwell,** you may be about to develop symptoms of COVID-19, which include fever, cough, sore throat or shortness of breath.
- **If you or your partner has a medical condition that can lead to more severe COVID-19,** you may also want to skip sex.
  - Medical conditions include lung disease, heart disease, diabetes, cancer or a weakened immune system (for example, having unsuppressed HIV and a low CD4 count).

## PREVENTION

- **Prevent HIV, other sexually transmitted infections (STIs) and unplanned pregnancy.**
- **HIV:** Condoms, pre-exposure prophylaxis (PrEP) and having an undetectable viral load all help prevent HIV.
- **Other STIs:** Condoms help prevent other STIs.
- **Pregnancy:** Make sure you have an effective form of birth control for the coming weeks.
